NPU-C MONTHLY MEETING

Woodward Way Pump Station Improvements Project

Tuesday, October 1, 2019
7 p.m.

Trinity Presbyterian Church

3003 Howell Mill Road NW | Atlanta, GA 30327

Please join the Department of Watershed Management (DWM) at the NPU-C meeting to discuss the Woodward Way Pump Station Improvements Project.

During the meeting DWM will discuss the proposed project design and provide additional project details. Feedback from residents who reside in this community will be encouraged.

City of Atlanta Department of Watershed Management (DWM) owns and operates Woodward Way Pump Station No.1 (PS-01) that will be upsized to handle larger flows. The proposed improvements include replacing the existing PS-01 with a larger pump station. The upsizing is required due to the replacement of Northside Drive Bridge over Peachtree Creek by the Georgia Department of Transportation.

For more information, contact Kinesia Cato, Public Information Officer at (404)546-3226 or email, kcato@atlantaga.gov.
