

SEWER GROUP 4 (SG4) SMALL DIAMETER REHABILITATION: CONTRACT A

PROJECT OVERVIEW

The City of Atlanta Department of Watershed Management (DWM) will make upgrades to the City's small diameter sewers, and the work will remedy defects in the City's sewer collection system. Rehabilitation will extend the life of the sewer 50+ years while meeting the requirements of the First Amended Consent Decree (FACD) and Second Amendment Consent Decree (SACD).

WHAT KIND OF WORK WILL BE PERFORMED?

Pre-cleaning and CCTV (Closed Circuit Television Video) of the sewers will take place, and point repairs will address localized pipe defects, and manholes will be rehabilitated. Various techniques are used to repair deteriorated sewer lines, and the scope of this project involves the use of various "trenchless technologies," including Cured-In-Place pipe (CIPP) lining and Pipe Bursting, as well as a more traditional method of repair such as replacement via open-cut excavation also will be utilized.

WHAT ARE THE BENEFITS OF THE PROJECT?

Structural upgrades to the system are necessary to replace older and deteriorated sewer pipes to maintain the reliability of the sewers. Rehabilitation of the sanitary sewers reduces the amount of extraneous flows, infiltration, and inflow (I/I) entering the system, in addition to reducing the amount of untreated sewage flowing into streams and creeks because of sanitary sewer overflows. As importantly, rehabilitation ensures long-term structural integrity of the system for 50+ years.

WHO WILL BE IMPACTED?

The project includes system improvements to small diameter sewers located in the Nancy Creek and Peachtree Creek Basins. The City will be working within sewer sheds PTC01_02B, PTC30, PTC21, PTC22A1A, PTC20B, NCR07_08B1, NCR10, NCR07_08A, and NCR11A1. The work affects Council Districts: five, six, seven, eight, and nine. Due to the nature of the construction work that will be done to repair and rehabilitate sections of the sewer line, disruption of service, partial/temporary lane and road closures, work on private property and noise may be experienced. Impacted residents and businesses will receive additional notification through mailings, notification letter distribution, doorhangers and/or face-to-face interaction prior to work starting in the area. City representatives may also attend NPU and community meetings to discuss planned work and provide periodic updates.

HOW LONG WILL THIS TAKE?

Construction is anticipated to last approximately 18 months. While work is taking place, we will make every effort to minimize any impacts on residents and business owners.

Project Start:	4th Quarter 2022
Project End:	2nd Quarter 2024
Contractor(s):	Ruby-Collins Inc.
Project Cost:	\$17,995,397
DWM Project Manager:	Brian Casner
DWM Construction Manager:	Cesar Laureano
DWM Contract Manager:	Elvis Anthony
DWM Public Information Officer:	Mark Scott markscott@atlantaga.gov 678-548-2162
